OUTPUT :

```
--------- Food Ordering System ---------

1. Add Customer
2. Add Menu
3. View Menu
4. Place Order
5. View Customers
6. View Orders
7. Exit

Enter your choice (1-3): 1

--------- Add Customer ---------

Enter customer name: Tom
Enter customer address: Chennai

Customer added successfully.

--------- Food Ordering System ---------

1. Add Customer
2. Add Menu
3. View Menu
4. Place Order
5. View Customers
6. View Orders
7. Exit

Enter your choice (1-3): 2

--------- Add Menu ---------

Enter Food name: Briyani
Enter Rate: 120

Menu added successfully.
--------- Food Ordering System ---------

1. Add Customer
2. Add Menu
3. View Menu
4. Place Order
5. View Customers
6. View Orders
7. Exit

Enter your choice (1-3): 4

--------- Place Order ---------

--------- Customer's ---------

ID    Customer        Address
---------------------------------
1     Tom             Chennai
---------------------------------
Enter customer ID: 1
